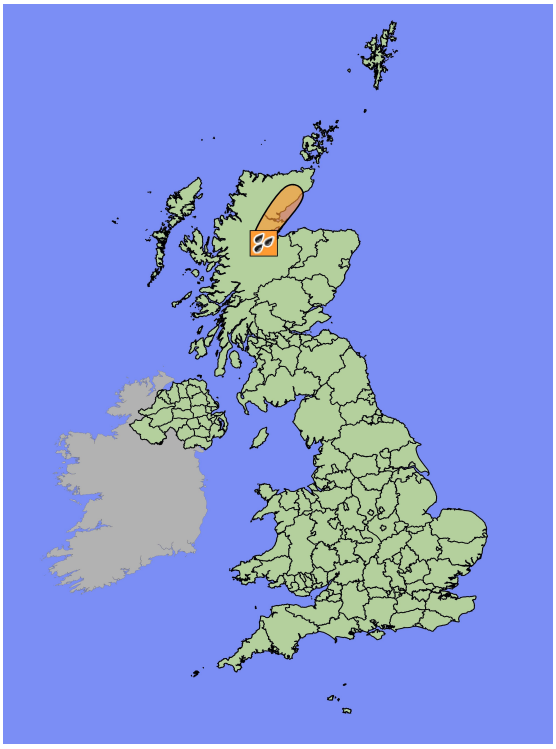
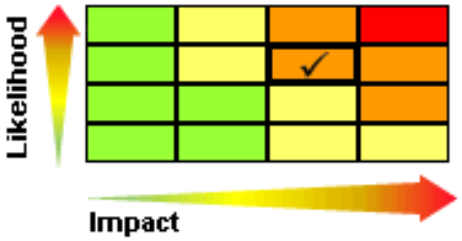
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal zone, along with its associated persistent and heavy rain, will remain slow moving across the north and northeast of Scotland today. This will allow some large rainfall amounts to build up with the potential for 30-50 mm to fall quite widely, and locally in excess of 80 mm on high ground in the east.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **10:30 on Fri, 12th Oct 2012** until **23:59 on Fri, 12th Oct 2012**

Heavy rain will persist across parts of Caithness and the east of Ross and Sutherland for the rest of today. The public should be aware that the heavy rain is likely to lead to localised flooding and some disruption to travel.
